---

## EDUCATION

---

Asia Pacific University

November 2024 - Present

*Bachelor of Science, Computer Science with specialization in Digital Forensics*

*Kuala Lumpur, Malaysia*

- **Relevant Coursework:** Advanced Forensics Methods, Ethical Hacking and Incidence Response, Introduction to Networking, Computer System Low Level Techniques

## PROJECTS

---

Aria | Vulnerability Scanner (Python)

July. 2026 – Present

[Repository Link](#)

*Open-Source Project*

- Developed a multithreaded vulnerability scanner in Python for identifying open ports, running services, and known vulnerabilities.
- Integrated NVD API to correlate detected services to known CVEs to the U.S. National Vulnerability Database.
- Implemented banner grabbing function to discover and detect service versions running on open ports.
- **Tech Stack:** Python, NVD API, Multithreading.

SOC Home Lab | Wazuh SIEM

Aug. 2025 – Present

[Writeup](#)

*Personal Project*

- Designed and deployed a SOC Home Lab with Wazuh SIEM to simulate enterprise security operations and monitoring.
- Configured detection rules to monitor authentication events, privilege escalation, malware indicators, and suspicious process execution.
- Integrated Ubuntu endpoints and pfSense firewall logs for centralized log collection and alerts.
- Simulated common cyber-attacks (e.g., brute-force login attempts, malware execution, privilege escalation) to validate detection capabilities.
- **Home Lab Stack:** Wazuh (SIEM), Ubuntu (VM), pfSense (Firewall), VMware (Hypervisor).

## WORK EXPERIENCE

---

Armorsphere

Oct. 2025 – Dec 2025

*Internship*

*Kuala Lumpur, Malaysia*

- Worked on a **VAPT-as-a-Service** project with OpenVAS and OWASP ZAP.
  - Performed **vulnerability assessments** for clients as part of a VAPT-as-a-Service engagement.
- Assisted in operations with incident response and escalation procedures.
- Initialized and governed IAM and PAM solutions with Active Directory to simulate real scenarios.

## SKILLS & INTERESTS

---

- **Programming Languages:** Python, C++, Java.
- **Software and Tools:** Wazuh, FTK Imager, Wireshark, Burp Suite, Nmap, Metasploit, Git, Github.
- **Skills:** Adaptability, Problem Solving, Teamwork, Technical Communication
- **Interests:** Traveling, Calisthenics, CTFs, Raving, Art, Bartending
- **Languages:** English – Native, Chinese – Native, Malay – Native, Cantonese - Conversational
